

Job Specification

Junior IT Support Engineer

About us

Perspectum Diagnostics Ltd is a medical imaging company that has been founded by physicians, scientists, and engineers with patented technology and know-how to develop solutions for major unmet needs in diagnostic medicine. We focus on the detection and accurate, quantitative measurement of liver, gallbladder and pancreatic disease, including precancerous and cancerous states using MRI data. Perspectum Diagnostics is based in Oxford, one of the main hubs in Europe for technology and healthcare companies, with a strong link to one of the finest Universities in the world.

The role

A dynamic and rapidly growing medical software company based in central Oxford is seeking for talented and enthusiastic Junior Support Engineer. Successful candidate will be responsible for supporting both Windows and Mac computers including cloud based services. If you are looking to join a company where you can find enthusiastic hard-working people, positive and productive work environment and great opportunities to learn new technologies then apply now.

You will be working in the heart of Central Oxford within dynamic team of young professionals including Image Analysts, Software Developers and MRI Specialists. You will be responsible for providing day to day support for 50 users within Windows and Mac based networked environment, maintenance duties as well as project implementations.

Responsibilities:

-  BTEC in IT or Degree in Computer Science/Networks or relevant
-  Good technical skills with Windows and Mac OS
-  Microsoft Office 365 experience
-  Antivirus and Firewall solutions
-  Problem solving skills with attention to details
-  Experience with cloud based technologies
-  Excellent communication skills, being able to liaise with technical and non-technical users
-  Networking support experience
-  Can-do attitude with a desire to learn new technologies
-  At least 1 year experience of carrying out IT Support

Skills required:

-  Experience with information security management systems such as ISO27001
-  Virtualization Technologies
-  Cloud computing AWS, Microsoft Azure
